

Task 9: Network Vulnerability Scanning

Tools:

- Nmap
- Alternatives: Masscan

Hints / Mini Guide:

1. Scan local network.
2. Identify open ports.
3. Detect services.
4. Identify OS.
5. Analyze vulnerabilities.
6. Save scan results.
7. Interpret risks.
8. Document findings.

Deliverables:

- Network scan report

Final Outcome:

- Network reconnaissance skills

Interview Questions Related To Above Task:

- What is port scanning?
- What is Nmap?
- Open vs closed ports?
- What is service enumeration?
- Why scanning is important?

📌 Task Submission Guidelines

- 🕒 **Time Window:**

You can complete the task anytime between 10:00 AM to 10:00 PM on the given day. Submission link closes at 10:00 PM

- 🔍 **Self-Research Allowed:**

You are free to explore, Google, or refer to tutorials to understand concepts and complete the task effectively.

- 🔧 **Debug Yourself:**

Try to resolve all errors by yourself. This helps you learn problem-solving and ensures you don't face the same issues in future tasks.

- 💰 **No Paid Tools:**

If the task involves any paid software/tools, do not purchase anything. Just learn the process or find free alternatives.

- 📁 **GitHub Submission:**

Create a new GitHub repository for each task.

Add everything you used for the task — code, datasets, screenshots (if any), and a short README.md explaining what you did.

- 📤 **Submit Here:**

After completing the task, paste your GitHub repo link and submit it using the link below:
